

Clinical Trial Stage Projects

Objective

The mission of California Institute for Regenerative Medicine (CIRM) is to accelerate stem cell treatments to patients with unmet medical needs. With this initiative, we intend to speed up support for clinical stage candidate stem cell treatments that demonstrate scientific excellence. Under this initiative, we will provide funding for eligible projects that are completing late stage preclinical development through any stage of clinical trial activity.

CIRM is establishing an open call for proposals and **will accept applications on a monthly basis** for three complementary award types described in the Program Announcements listed below. **Please note that the Program Announcements have been updated.**

For Applications **submitted after December 18th**, please refer to the following:
